# BRITISH-BUILT BATTERY STORAGE SOLUTIONS IN AGRICULTURE

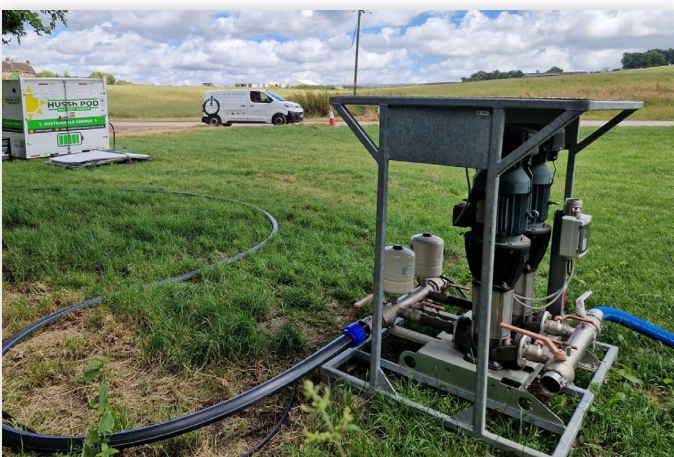

## 1 *Reliable Off-Grid Power*

Hussh Pods provide stored battery power where grid access is weak or unavailable, ensuring irrigation systems, water pumps, sensors and farming systems run without interruption.

## 2 *Fuel Efficiency and Cost Savings*

By using stored energy and decreasing unnecessary fuel consumption, Hussh Pods can lower agricultural operational costs, cut diesel usage, reduce maintenance, so you can reap long-term savings.

## 3 *Sustainable Water Management*

Hussh Pods enable your irrigation and pumping systems to be timed, making sure your operations are running efficiently. This allows smart water and environmental targets to come to fruition - saving money on your agrarian lands.
